MEMORANDUM FOR: Colonel Terhune 27 June 1956

SUBJECT: Recall of Advanced Reconnaissance System funds from Wright Air Development Center

An investigation of a reciprocating engine for an ARS auxiliary power supply was to have been conducted by Westinghouse Air Brake Company. FY 56 funds amounting to $50,000 were made available to Wright Air Development Center on O/A 620-56-5 for this purpose. Because the contractor declined to bid, Wright Air Development Center will not be able to obligate and it is desired that these funds be returned to Western Development Division to be applied to Contract Change Notice No. 1, to the Lockheed Design Study Contract.
